WHY CONVERT TO LED?

COOL

LEDs do not get hot and produce only 3.4 btu's per hour

NO MERCURY

Mercury is not used in manufacturing

EFFICIENT

LED light bulbs use a 1/3rd-1/30th of energy compared to incandescent

BRIGHT

LED light is directional compared to incandescent

LONG TERM REWARDS

Converting from a neon sign to LED light is a great investment. LED light installation uses smaller pass-through holes into your building and requires less maintenance. Installation is quick and easy — we will walk you through every step of the process.

ABOUT US

We are a family-owned and managed company with a mission to provide top notch customer service and use only the highest quality state-of-the-art materials. SignPlex was born as the graphic division of New Mexico Fleet Design which began in 2002 as a one-stop repair facility for the commercial fleet industry. In 2011, SignPlex branched off into its own division and has grown every year.

As an attribute to our success, we invest heavily in employee culture. Our core focus is to bring success to our employees, clients, community and vendors.

CUSTOMER FEEDBACK

Reviews on Google:

"I came into SignPlex as a drop in customer expecting to be told a day or two. They fit me right in same day and exceeded expectations. EVERY person I dealt with was friendly and very helpful. Thank you SignPlex!"

- Wayne S.

"The entire team at Signplex is awesome. ... The quality of our brushed aluminum logo is excellent and it looks amazing. I will definitely use Signplex again in the future."

- Eloisa R.
